ABOUT ME

I design and build eco-friendly gig bags since 2012.
I'm also a musician, I love Fine Arts and sustainable lifestyle.
For this reason I started to conceive unique sustainable eco bags for musicians.
My goal is to offer a new concept of gig bag, strong and light in order to be your trusted travel friend.
I believe in circular and sustainable production.
This is what pushed me to found CREA•RE, opening new possibilities for musicians who look for sustainable, vegan-friendly, eco-friendly unique gig bags.

Marco Migliorisi

ABOUT CREA•RE

QUALITY • ECOLOGY • DESIGN

The constant search for a quality and durable eco-friendly gig-bag combined with unique craftsmanship, authentic design and modern style created the right circumstances for the birth of CREA•RE brand.

Merging traditional Italian craftsmanship methods with sustainability and extreme outdoor materials, CREA•RE represents not only superior musical instrument protection, but an ethical, ecologic, vegan, sustainable and technological improvement in luggage design.

REDEFINING DESIGN & MUSICIAN CHOICE

At CREA•RE we work hard to offer new bags with no shortcut in quality, each one unique with high style and an history behind the material we used.

Our bags are made from creators for creators.

We apply constructionism and materialism playing with macro and micro in order to transform what we see every day in something new.

HI QUALITY MATERIAL

CREA•RE cases are built using only high-test materials with extreme resistance to the elements such as truck tarps and/or Ad banner, paragliding wires, safety car belt.

The zippers are resistant to thousands of openings and closings.

The accessories are designed and chosen to tackle traction and extreme weights.

Each bag is carefully examined for integrity, strength and durability.

All used materials are usually projected to last and protect even human life.

HANDCRAFTED AND UNIQUE

Each CREA•RE Eco Bag is totally handmade.
All materials are selected, composed, handcut and assembled one by one.
Each model is patched to be unique, just like you.
Each bag is sewed using the traditional Italian craft techniques.
In each CREA•RE bag tradition in craft meets the new materials physical feature.
CREA•RE offers you a better and more ethic musician lifestyle.

ECOLOGIC & SUSTAINABLE DESIGN

CREA•RE design is specifically thought to elevate the range of these materials and create unique and ecological design objects.

Each product designed by CREA•RE is based on a few but important golden rules: comfort and practicality in use, portability during travel, optimal ratio of weight / resistance, optimal instrument protection and uniqueness.

Materials upcycled by CREA•RE are really difficult to recycle ecologically otherwise. They are of regional origin, so no more pollution for further travels.

They are cleaned in an environmental friendly way with hot water, frozen dew, organic products such as vinegar, baking soda and home soap.

In this way we help to reduce the pollution and the world waste production.

DESIGNED FOR PERFECT TRAVEL EXPERIENCE

We love travel and use ecological means of transport. For this reason rock solid, industrial webbing handles come standard on CREA•RE cases.

Bar-tack stitching reinforces for strength, while high grade safety car belt provides a super comfortable grip.

In order to give you the best travel experience we pad the shoulder straps to provide an high level of comfort while in use.

You find internal pockets and/or hidden pocket for your precious accessories, documents or money.

HIGH QUALITY DETAILS

At CREA•RE each detail is important. For this reason our bags come standard with the strongest zipper pulls and self-healing nylon zippers.

Double zippers on big compartments also double their lifespan.

We use only metal accessories, sewing by experienced and professional hands.

ELECTRIC GUITAR BAG

ECO ELECTRIC GUITAR BAG

DESIGNED FROM MUSICIANS FOR MUSICIANS

This case is the final result of years of research focused in the perfect electric guitar case that is easy to carry, light, resistant and able to protect the guitar from shocks, unexpected and weather.

This collection offers the best option for musician who wants to protect his guitar, have the best travel experience, the ideal space for accessories and a unique ecologic case.

GUITAR & BASS STRAP

ECO GUITAR STRAP

SUSTAINABLE DESIGN

Each CREA•RE Eco Guitar Strap is made with upcycled safety car belt and banners from Museum of Contemporary Art of Barcelona MACBA. The couch straps come from local scrap car companies.

Each guitar straps CREA•RE is sewed using pedal sewing machine from Forties Singer 17-2

MINIMAL AND CONTEMPORARY DESIGN

We design and assemble each guitar strap focusing on minimalistic design in order to valorize the subtle texture design of each couch strap. The composition of each MACBA banner is inspired by the contemporary artists like Malevic, Strzeminski, Burri, Bordeta and many other great example of simple and unique art composition.

UNIQUE CRAFTSMANSHIP

For each CREA•RE Eco Guitar Strap we choose the most beautiful couch straps, paying attention to color and texture. For each Guitar Strap we cut unique banner or truck tarp patter pieces and then patching them with the couch strap that better fits in color and texture.

Each CREA•RE Eco Guitar Strap is unique just like you.

PRECISE DETAILS, STRONG ACCESSORIES

Each CREA•RE Eco Guitar Strap is handcut, assembled one by one and sewed with our Singer 17-2. Strong and light brushed nickel buckle add resistance and minimalistic design detail.

END PIN GRIP

We use four layer of strong banner or truck tarp on each side of the CREA•RE Eco Guitar Strap. The holes and the cuts in the guitar strap is protected to offer you a great safe grip on your guitar.

FULL CONFORT

Couch straps are designed to travel and be comfortable and protect people in case of accident. For this reason the couch strap is comfortable and safe on your shoulder and for your guitar. Each guitar strap can hold up to 4 guitar picks (two in the front side and two in the back side).

The guitar strap is 1.8" wide [4,6 cm] and fully adjustable from 37.4" up to 64,5" [95 cm - 164cm] (pin-to-pin)

Guitar picks not included
